

## Company Overview

Rise Drilling is a preconstruction-focused deep foundation contractor specializing in open-hole drilled foundations across complex subsurface conditions. We partner with general contractors early to align scope, pricing, and constructability—reducing geotechnical risk and increasing bid and schedule certainty before construction begins.

## Foundation Delivery Capabilities

These services are executed within a disciplined preconstruction and risk-alignment process to ensure predictable outcomes in the field.

### Preconstruction & Risk Alignment

- Early-stage geotechnical review and drilling methodology alignment
- Clear definition of assumptions, inclusions, and exclusions
- Identification and management of geotechnical uncertainty
- Bid-phase collaboration to align foundation scope with overall project strategy

### Drilled Shafts / Cast-In-Drilled-Hole (CIDH) Foundations

Foundation drilling for bridges, retaining walls, cell towers, solar projects, and more.

### Soldier Piles & Ground Shoring Systems

Installation of soldier piles, lagging systems, and temporary/permanent shoring.

### Drilled Piers

Efficient, accurate excavation and reinforcing installation for deep foundations.

### Limited-Access / Difficult-Access Drilling

Specialized equipment and methods for constrained, steep, or sensitive sites.

## Key Capabilities

**Expertise in varied soil conditions:** collapsible soils, groundwater, rock drilling, cobbles/boulders

**Full-service field operations:** drilling, casing, slurry management, reinforcement placement, and concrete placement & pumping.

**Safety-first culture** with rigorous training and compliance

**Reliable scheduling**, daily reporting, and contractor communication

**Modern, well-maintained** fleet optimized for productivity and precision

## Industries Served

- Transportation & Infrastructure
- Commercial Construction
- Public Works
- Utilities & Energy
- Environmental & Geotechnical Engineering

## Why Rise Drilling

Rise Drilling is disciplined where others improvise. We engage early, define assumptions clearly, and execute with intention—so general contractors can bid with confidence and build without surprises. Our focus is not just drilling production, but reducing foundation-related risk before it impacts cost, schedule, or relationships.
